

Understands your data better

Providing accurate data
collection with an end-to-end
data integration and analytics

Embrace agility with the market-leading scalable, high performance enterprise data integration platform.

Integratica Center

Integratica offers a modular, comprehensive MDM solution designed for flexibility: Start with your most pressing data pain and business needs, then grow the system as your needs expand.

Main Features

● API Gateway & Management

A fully managed service that makes it easy for developers to create, publish, maintain, monitor, and secure APIs at any scale. APIs act as the "front door" for applications to access data, business logic, or functionality from your backend services. Using API Gateway, you can create RESTful APIs and WebSocket APIs that enable real-time two-way communication applications. API Gateway supports containerized and serverless workloads, as well as web applications.

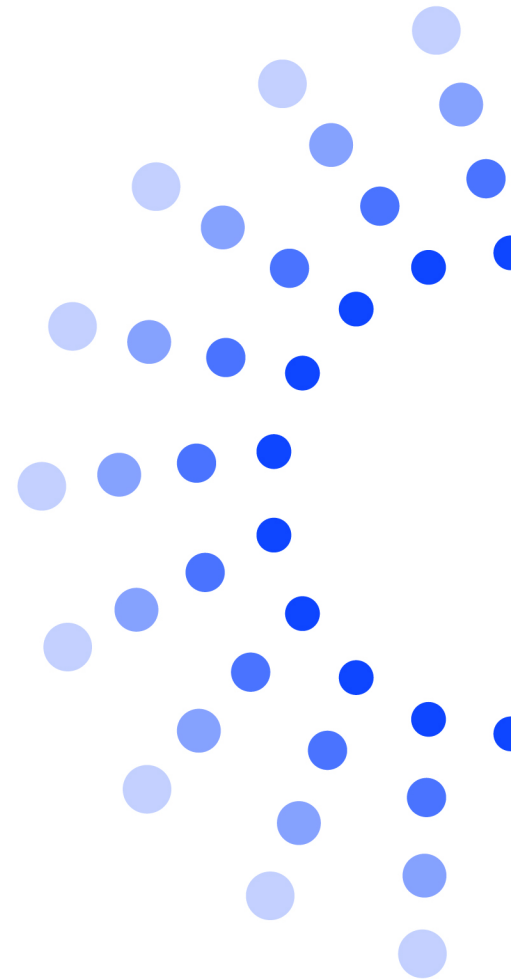

● BlazeEngine - Data Index & Search

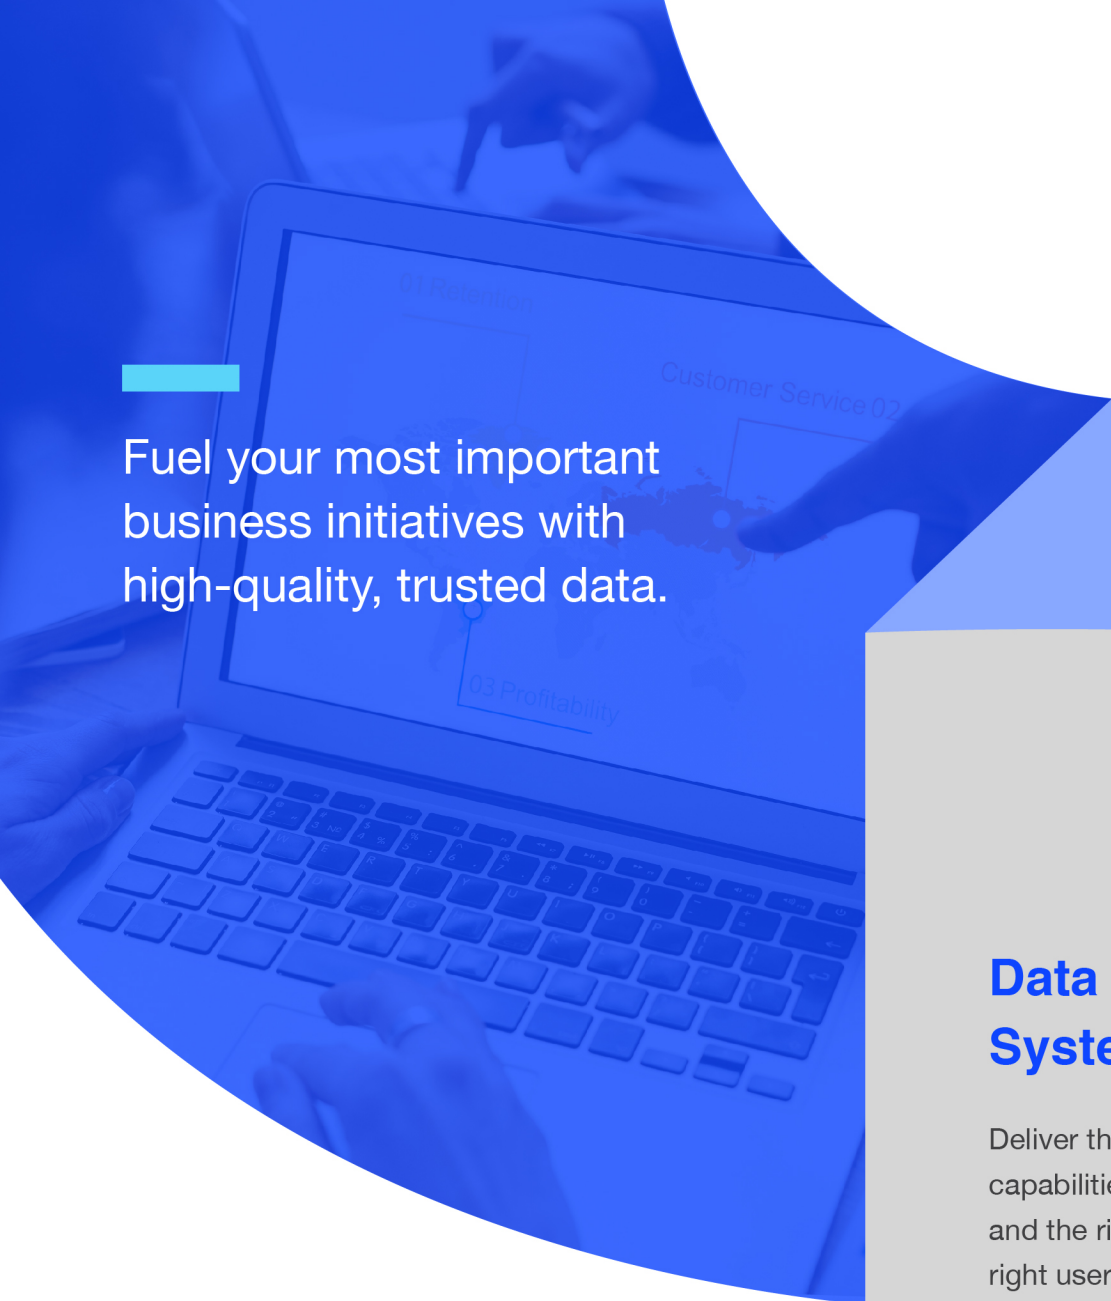

Built-in powerful full-text search capabilities using inverted index technology and its power comes from its tunable relevance scoring, advanced query DSL, and wide range of search enhancing features.

Understands your data better

Providing accurate data
collection with an end-to-end
data integration and analytics

Fuel your most important business initiatives with high-quality, trusted data.

Data Quality System

Deliver the right data quality capabilities at the right time and the right scale to the right users.

Main Features

- **Powerful Data Discovery and Profiling Tools**

Profile data and perform iterative data analysis to uncover the data relationships and for a better problems prevention.

- **Collaboration (to define) Quality Rules**

Profile data and perform iterative data analysis to uncover relationships and better detect problems.

- **Realtime Quality Rules as Service**

Allows business users to build and test logical business rules without relying on IT.

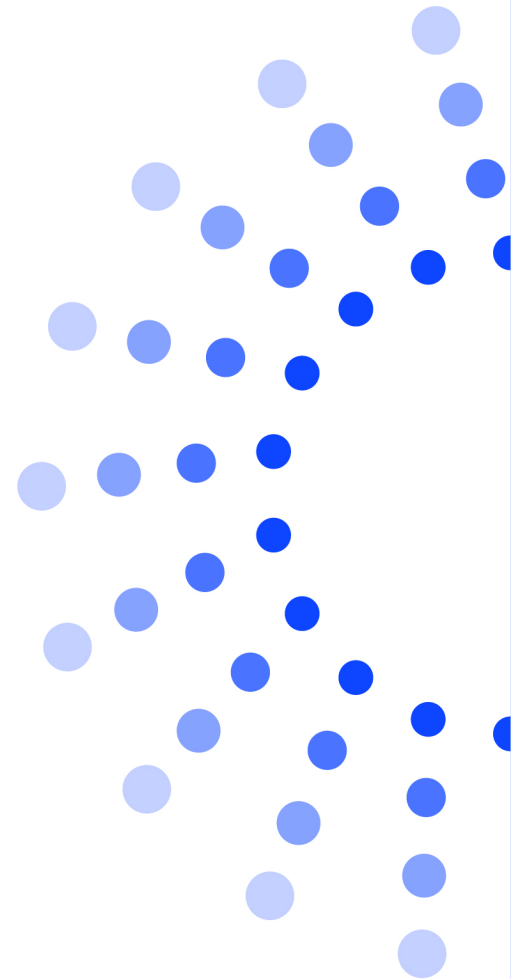

Integratica

Understands your data better

Providing accurate data
collection with an end-to-end
data integration and analytics

Use Integratica Integration Intelligence System products to quickly integrate data and applications—wherever they resides.

Integration Intelligence System

Integration Intelligence System offers organization a scalable data integration platform. The platform allows you to extract data, transform it in any style and load (ETL) it to any system, supporting faster time to value and reduce IT risk. The integrated platform delivers a wide range of data quality capabilities from data profiling, standardization, matching & enrichment to active data-quality monitoring.

Main Features

● B2B Data Exchange & Integration

Modern intercompany exchange to securely and collaboratively integrate any data with partner networks.

● Super Data Catalog Management

A machine learning-based data catalog that lets you classify and organize data assets across any environment to maximize data value and reuse, and provides a metadata system of record for the enterprise

● Advanced Data Transformation

An enterprise-class data transformation solution for any data type, regardless of format, complexity, or size.

Early Warning System

Early Warning System (EWS) is technology and associated policies and procedures designed to predict and mitigate the harm of natural and human-initiated disasters and other undesirable events. In IT (information technology), early warning systems are used in a variety of environments.

Features

● Web Application + Query Builder

A business enterprise class application that runs in advanced web technology, that can build complex query machine from super simple human readable action.

● Topic Management

Create your own Index and Topic, and our machine learning engine can determine to send it directly to your device.

● Subscription Management

User can directly subscribe to certain topic to get an interesting topic to their device.

● User & Security Management

Our powerful user management and security matrix can protect your topic from unauthorized access and can self detect intruder with built-in 'early warning engine'.

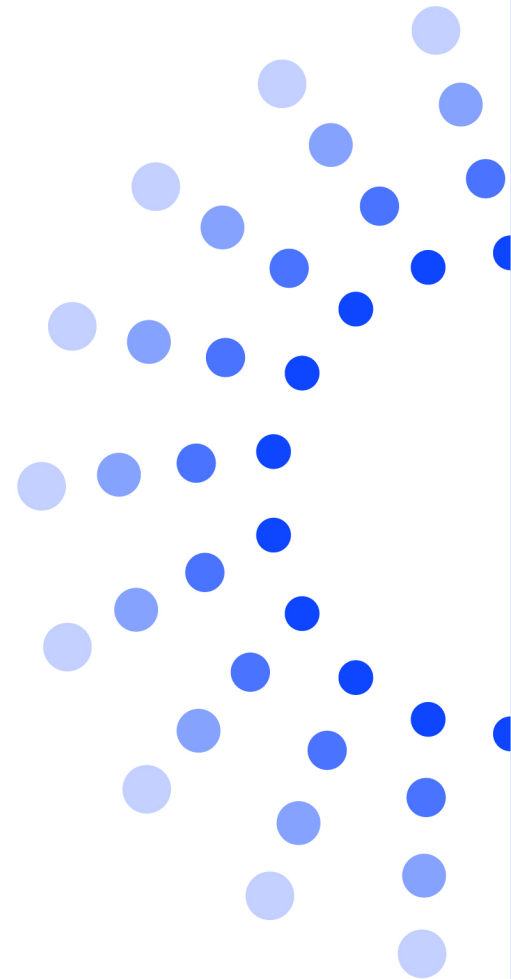

● Powerful Integration using API

Experience the fastest method to create a REST API without code and 'drag & drop' developer tools.

Understands your data better

Unleash the value of your data with a modular, end-to-end MDM solution.

Master Data Management

Integratica offers a modular, comprehensive MDM solution designed for flexibility: Start with your most pressing data pain and business needs, then grow the system as your needs expand.

Main Features

- **Multidomain MDM Solutions**

Multidomain solution with complete flexibility to support any master data domain and relationship—whether on-premises, in the cloud, or both.

- **x360 Insights**

POLE Integratica is not only showing relation, it also will give you an insight of your data and create new possibilities of better solution.

- **MDM Relate360**

With our POLE integratica engine you can create advanced relational data between your data and visualise your data for the better understanding of your information.
