

# Datafuse Secure Video Conference

A reliable video conferencing platform for meetings, webinars, and education. Built with golden-standard safety and security.

Experience great video quality. Even in big rooms with hundreds of participants with up to 49 concurrent streamers per page. Handle 1-1 calls or webinars with over 2000 users.

Datafuse Secure Video Conference takes the stress away from hosting effective video conferences

## Why Datafuse Secure Video Conference

### Stable and secure meeting

Experience a secure, smooth, and reliable video conferencing platform that is always established quickly, GDPR-compliant, and encrypted.

### Get more than just product support

With Datafuse Secure Video Conference, you don't just get tech support. You get a partner. We offer our customers true, comprehensive support that goes beyond troubleshooting.

### Host with confidence and peace of mind

Match your brand's style with cool features like custom colours, fonts, and more. Make your meetings look professional and beautiful.

Secure. Private. Scalable.

## Built in security & compliance

An encrypted and GDPR-compliant video conferencing platform. In addition, auditability is available through logged activities.

## A complete solution for secure and private communication

### REST API

Embed Datafuse Secure Video Conference features directly into any software, app or website.

### Mobile app

Provide a first-class mobile experience with hand raising, chat, Q&A, shared notes and more.

### Recordings

Capture webinars in full HD MP4 and store them in a secure cloud format.

### Layouts

Arrange your screen tiles exactly as you want them with flexible layout modes, synced layouts, and predefined layouts.

### Breakout rooms

Boost your video conference productivity by splitting your audience into sub-groups.

### Password protection

Password-protect your events and lock access to your meeting room after the session starts.

### Screen sharing

Share your screen, app windows, or browser tabs without any lag or buffering.

### Polls

Create engaging custom polls for your video conferences and share the results.

### Reporting and statistics

Analyse post-event statistics with our advanced data suite.

### Live chat

Let participants chat with a speaker or amongst themselves using public and private messaging.

### User management

Manage multiple user profiles within one account.

### Live streaming

Instantly stream your events to Facebook, YouTube and Vimeo.

### Waiting room

Choose who enters your video conference and when with your private event lobby.
